About Us

Spec Ops Service

Spec Ops Service (SOS) is a veteran owned small business based in Houston, Texas. SOS was founded by former US Special Operations personnel to provide unmatched, comprehensive security services to individuals, corporations, and government agencies in high-risk areas around the World.

SOS is licensed and fully insured. All of our security operators are former US Special Operations personnel.

We utilize an international network of security professionals to assist in global operations. All of our local security teams are fully vetted, highly trained security experts in their region with backgrounds in special operations, intelligence, and international business.

Executive Protection Services

SOS provides a full range of executive protection services to individuals and corporations traveling around the world.

Services include:

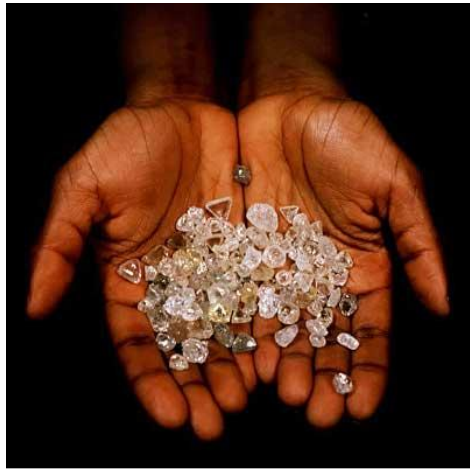

- Pre-Arrival Security Consulting
- Comprehensive Due Diligence
- Airport Transfers
- Security Drivers
- Mobile Protection Details
- Convoy Security
- Site/Static Security
- Tactical Security Training
- Kidnap & Ransom Response/Insurance

Our select team of former Special Operations personnel has years of experience working in high-risk locations in Latin America, Africa and Asia. We maintain current travel visas to key mining and oil production countries, in order to allow our operators to travel on short notice.

Product Verification

A vital service that SOS provides our clients is Product Verification. SOS can escort the buyer to the buy site or provide a third party subject matter expert to verify the product authenticity and quality prior to purchase.

Product verification allows the client to ensure the legitimacy of foreign offers, prior to risking travel to the site personally to meet with new sources.

We can draw on our network of gemologists, oil analysis professionals, and precious metal specialists, to ensure that the products that you are buying are genuine.

Contact us for more information regarding our Product Verification Services.

Mine/Oil Field Security

Spec Ops Service provides a wide spectrum of mine and oilfield security solutions for the natural resources industry. Our highly trained personnel have decades of experience working in developing nations, on their own and alongside local operatives. SOS can provide a team comprised entirely of former Special Forces Operators, a small team of security advisors to lead your current security force, or training services at our tactical training center in Texas. We can also provide training on location, along with security assessment services.

Convoy Security & Mobile Protection Teams

Spec Ops Service operators are experts in high-risk convoy security operations. Through our Armored Vehicle Rental program we can provide armored passenger vehicles to our clients around the world.

Along with the typical armored sedans and SUV'S, we also have access to a B6 armored ambulance in Kenya, 2 B7 armored Lenco Fighting Vehicles in Afghanistan, and a B6 armored bus in Lagos, Nigeria.

Did you know that SOS worked a D.O.D contract for high risk convoy security in Afghanistan?

Aerial Surveillance

The Icon A-5 is a low speed ultralight aircraft that is capable of landing on the ground or in water. The small size of the A5, along with the capability to fold in the wings, allows the aircraft to be shipped in a cargo container or via truck to any location in the world. Our ICON aircraft features video and FLIR payloads to allow aerial monitoring day or night. The ICON is ideal for high risk convoy security, broad area mining site security (B.A.M.S.S.) maritime drilling, and counter piracy operations.

Contact us directly for more information on piloted aerial surveillance.

**Aircraft are currently in the Middle East and available for immediate deployment.*

UAV Surveillance and Assessments

Spec Ops Service can also provide man-portable UAV's for security or site assessments. Our staff include trained UAV pilots with experience flying UAV's in combat.

SOS also offers, for lease or sale, Unmanned Aerial Vehicles and can provide operator training to your existing security forces. The UAV's that we utilize are user friendly and new operators can be trained in 2-3 days .

Surveillance

- Assessment
- Reconnaissance
- Surveys
- Aerial Imaging

Target Identification

- Threat Identification
- Target Validation

Response

- Avoidance
- Interdiction
- Withdrawal

Secure Shipping

SOS is closely affiliated with ground transportation, maritime and charter aircraft companies around the World to ensure that our client's products are safely delivered to the destination. We can handle cargo from large multi-ton shipments of Coltan from the Congo to China, or a small satchel of diamonds from Ghana to New York.

By utilizing our Product Verification and Secure Shipping services, our clients can safely conduct international business deals without risking travel to volatile source nations.

***Unlike other secure shipping companies, SOS provides product verification services from trusted third party providers.**

Armored Vehicle Rental

Spec Ops Service provides armored passenger vehicles for rent or long-term lease around the world.

SOS currently has armored passenger vehicles located in the US, Mexico, Honduras, Colombia, Venezuela, Brazil, Chile, Argentina, London, Nigeria, Libya, Kenya, South Africa, Afghanistan, Iraq and in the Philippines. From these locations, we can provide armored vehicles almost anywhere in the World.

Secure Air Freight

ANTONOV AN-26

- **Crew:** 5 (2 pilots, 1 radio operator, 1 flight engineer, 1 navigator)
- **Capacity:** 40 passengers
